---

## Tools

**Programming Languages:** Javascript, Typescript, Java, C#

**Frameworks:** NextJS, ASP.NET Core

**Developer Tools:** Docker, VS Code, Git, GitHub, Bitbucket, Insomnia, Postman

**Cloud:** AWS (EC2, VPC, Lambda), Cloudflare

**OS:** Windows, Linux (Debian)

---

## Experience

FEBRUARY 2024 - APRIL 2024

**Beppo, Makati City** – Dev Intern

- Worked on Beppo's frontend redesign and added features using NextJS, making the product more responsive and intuitive to use
  - Partly rewrote Beppo's admin frontend in NextJS with both DX and UX in mind to keep future maintenance easy without requiring a new workflow to navigate and use
  - Guided my fellow intern in co-rewriting Beppo's admin frontend by reviewing their code and giving suggestions to make the final product as concise as possible
- 

## Education

AUGUST 2020 - APRIL 2025

**Mapúa University, Makati City** – Bachelor of Science in Computer Science

Specialized in Application Development and took Cloud Computing and Blockchain as electives

---

## Projects

**Personal Website** – <https://www.cedoromal.com>

This is a self-hosted personal website about myself made with Go, Gin, and Alpine.

**Self-Hosted Services** – <https://home.cedoromal.com>

A hobby project where I host a set of services deployed on my home server using Proxmox VE, Docker, Cloudflare Tunnel, and many more. The link above is a dashboard showing said services.

**Sample Dotnet Web API** – <https://github.com/cedoromal/sample-dotnet-webapi>

A simple CRUD backend made with .NET 8 and utilizes Cloudflare R2 (an AWS S3-like service) for CSV uploads.
